Seminar on Identity – Wednesday mornings: 8:30 - 11:30

For this doctoral seminar on Identity a great many topics can be included. The “Identity” concept is multi-level and multi-disciplinary, ranging from personal and social identity construction, to group, organizational, and national -- encompassing multiple identities, challenges, conflicts, manipulation, and many more!

I will try to include a variety of these in the coming seminar, and welcome suggestions about issues and readings you think would be great to include.
